

We have an exciting career opportunity in the Public Health Services industry to fill the role of a:

Senior Data Analyst (Hardware)

Our client is looking for a responsible, analytical problem solver who is keen to take on a challenge. You will be responsible for installing, configuring and maintaining both software and hardware at various levels within the health system. The position offers a stimulating career for IT professionals.

A degree/relevant qualification in IT or a related field plus ideally a minimum of 3 years' experience in hardware maintenance, database management and helpdesk will be an added advantage. Demonstrated background knowledge of DHIS2 and OpenMRS software systems will be advantageous. In addition, you should be solutions oriented, take pride in your work, be passionate and derive personal satisfaction from accomplishing results. Kindly forward your motivation letter and CV to Bradley@potentia.com.na by Monday, 16 July, 2018.
